

## High Speed Data Manipulation for Large & Complex Projects

- ✓ *Reduce Project Risk*
- ✓ *Avoid Costly Bottlenecks*
- ✓ *Create a Competitive Advantage*
- ✓ *Minimal to Zero Training Required*

In a single pass, CoSort9 from Innovative Routines Int'l (IRI) rapidly transforms, secures, and generates reports from massive volumes of data. Many of the world's largest IT organizations depend on IRI's intuitive, high-performance software for their data warehouses, packaged applications (ERP/SCM/CRM/etc.), web apps, and other mission-critical systems. Now, it's easier than ever for IRI Expert Partners to leverage this cost-effective suite of tightly integrated tools into a significant competitive advantage.

### Key Features

- ✓ *Best-of-breed speed and efficiency* in both job scripting and runtime execution. Parallel operations against flat files in the CoSort 9 system often run in 1/8<sup>th</sup> the time of processing within ETL, DB, or other sort environments.
- ✓ *Fast integration* into existing ETL and database environments like DataStage, Informatica, Oracle and DB2. Accelerates unloads, sorts, and loads seamlessly.
- ✓ *Secure data in motion* with portable, granular, and flexible protections, including 256-bit AES at the field level. This is especially important when shipping data off-site.
- ✓ *Test data generator* creates safe and realistic data for outsourcers, prototyping, stress-testing, and more.

### Partner Benefits

- ✓ **Reduce risk and stay on-schedule/on-budget** with faster development, processing, and results.
- ✓ **Mitigate security breaches** while data is transiting systems.
- ✓ **Helps comply with SLA's** and increases customer satisfaction by helping improve system throughput, scalability, and availability.
- ✓ **Deliver more competitive proposals** with reduced data integration/manipulation timelines and costs.
- ✓ **Grow add-on business** with the flexibility to address additional customer data issues outside of project scope.
